Workers' Compensation Commission

October 31, 2012

SC Workers' Compensation Commission Launching IAIABC EDI Release 3 on November 1, 2012

The SC Workers' Compensation Commission (SCWCC) will launch the newest version of the International Association of Industrial Accidents Boards and Commissions (IAIABC) Electronic Data Interface (EDI) on Thursday, November 1, 2012. The upgrade to EDI Release 3 allows the Commission to obtain additional claim data to improve the claims adjudication process and maintain industry standards in data reporting.

The Commission adopted the IAIABC EDI standard in 1997 for the First Report of Injury (FROI). IAIABC released the current version accepted by the industry today in 2003.

Please contact wccit@wcc.sc.gov to begin testing and the approval process for submissions in EDI Release 3 format. For more information and documentation click [here](#).
