Net Present Value Tables

Pursuant to R67-1605 the Net Present Value (NPV) tables are calculated at the yield-to-maturity rate of the Five Year U. S. Treasury Note reported by the Federal Reserve on the first business day following January 1. The regulation further states the discount rate shall not exceed six percent or be less than two percent.

The Five Year Treasury published by the Federal Reserve on January 4, 2016 was 1.7336%. (Source: <http://www.federalreserve.gov/releases/h15/data.htm>, Table "Treasury Constant Maturities"). Therefore, the Net Present Value Tables for the year 2016 will remain the same as 2015 for weeks one through 100 at two percent (2%), and weeks 101 through 500 at two percent (2%).
